

I am both shocked and disappointed that at a time when young men and women of the United States Armed Forces are fighting and dying on foreign soil, a US Agency would spend an minute of time engaged in conversations that focus on denying americans first amendment rights.

This attempt by the NAB in Petition 04-160 is merely an attempt by big business to prevent the average citizen freedom of choice as to who shall provide them, of all things Traffic and weather. Isn't freedom of choice what we are fighting about. Isn't our involvment in Iraq an issue of removing a dictator who stifled among other things the simple, basic freedom of choice from his people. Why would the FCC entertain such a petition, that so clearly strikes out against the common citizen. I emlore the FCC to reject Petition04-160 and to move on to more appropriate matters.
